M.W. SHAW (Steelworkers) LTD.

(HYDRASTUMPER INTERNATIONAL SALES)

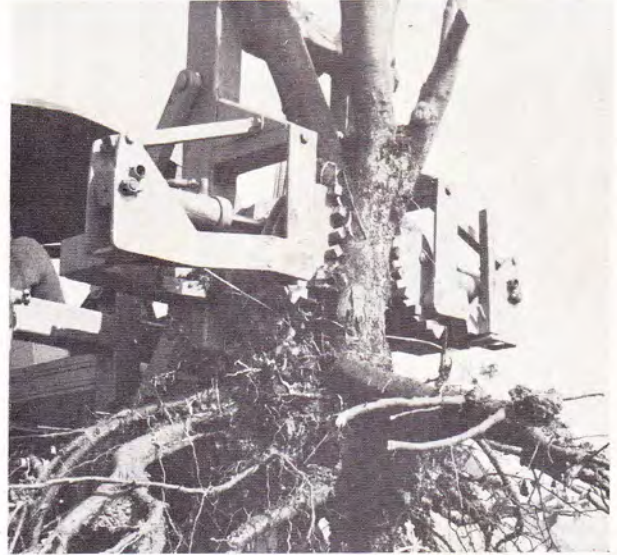

FORGE WORKS, ASTON CANTLOW, Nr. SOLIHULL, WEST MIDLANDS B95 6HZ

Telephone: Great Alne 495 (STD 0789 - 81495)

A tree or stump lifted from the ground in less than a minute

HYDRASTUMPER 50 Suitable for complete clearance or thinning, and removing overgrown hedgerows.

Trees easily transported whole, alternatively the tree may be felled leaving 76 cm (2' 5") of the stump for the machine to grip.

H.S. 50 ROOT CLAW ATTACHMENT An extra attachment for the Hydrastumper 50 which enables the stumps of trees, previously felled at ground level, to be extracted.

HYDRASTUMPER 35 Suitable for trees up to 88cm (35") girth. Mounted on a 35 h.p. Tractor is ideal for plantation work in many parts of the world.

- Both machines are suitable for continuous operation on large scale projects.
- Simple in construction, with negligible maintenance.

EXTRAS FOR HYDRASTUMPER 50 ONLY EXTRA POWER Additional lifting cylinder may be fitted for use on tractors over 70 bhp when equipped with substantial front end weight.

ROOT CLAW KIT fits in place of the standard jaws.
HYDRAULIC POWER PACK for PTO drive, complete with tank and filter. This enables both hydraulic systems to be used simultaneously giving better output.

- Replaceable bushes fitted to all main pivot points.
- Machine lifted clear of the ground during transportation to reduce sheet erosion problems.
- Little load is placed on the tractor while the tree is being extracted. Maximum lift — usually in excess of 140 cm (58").

SHIPPING SPECIFICATION partly assembled in crates

Model	Net Wt.	Gross Wt.	Length	Width	Height
